## What is the purpose of introducing a membership program?

All those working in our country who earn every rupee by hard work, all their earned money is looted by cyber criminals just by one mistake. You can understand from this figure how many frauds happen in our country and how many people are able to report. If we talk about only 2020, there were around 11,58,208 frauds cases reported (but according to NCRB, out of which there were only 50,035 cases registered) and in 2021 it was around 14,02,809 cases reported. Now you must have understood how rapidly cybercrimes are increasing.

After the covid lockdown, we have made more than 50000 people aware through online cybercrime awareness training, more than 10000 people aware through online webinars and offline workshops, through social media and other digital platforms, more than 30000 people have been made aware of new cyber frauds through social media posters and videos.

Now, taking this series of awareness training forward to reach every corner of the country, we have come up with a membership program for all those people who think about the welfare of their country and want to do something for the society as well as want to create a different identity in the society and this small effort of yours will play an important role in maintaining the happiness of someone's home.

Ex Paytm and Snap deal

**CollCom** stands for **(College-Community)**, connecting college to community. It is a non-governmental and non-profit youth-based registered organization. It is also registered on Niti Aayog and certified with 12A and 80G of Income Tax Act, 1961.

Since its inception, we have positively impacted the lives of more than 50,000 people across the country through various dimensions of social service such as education, health, environment, research, and cyber security.

The organization aims to connect colleges with the community to develop civic responsibilities among youth and to strengthen National Service Scheme (NSS) units, NYKS and other youth-led organizations in schools and colleges across the country.

The organization motivates students and working people to help poor families and children living on the roadside, displaced people, slums, orphanages, old age homes, sanitation workers, disabled people, drug addicts, prisoners, farmers, so that they can understand their problems and needs and involve themselves in this social problem-solving process along with studies, so that the lives of these people or villagers can be raised to a higher material and moral level

## Functions for members

All the members will have to take forward or share our series of Cyber Sanskar Training and Magazine, they will have just one goal, to give information about cyber security to all the people of their district.

- Online - To make our online training reach as many people as possible.
- Offline - You will make people of any school, college, coaching institute, and village aware. For which we will provide you content, graphics, and templates online.
- If you are able to make large number of people aware at the district level, then you will be elected as the district level president. All our volunteers working in that district will work under your supervision, and you will help them in achieving their further goal.
- Similarly, you will be elected president first at the district level, then the state and then the national level based on your performance. You will also train all the volunteers working under you. CollCom will provide all necessary assistance.
- You will also collect information about incidents related to cybercrime in your district, which we will also publish in our magazine. You will also share all the posts made by CollCom on your social media posts.
- It will be mandatory for you to participate in all the webinars organized by CollCom.
- Apart from cyber security, you will also get opportunities to work in other areas like environmental pollution control, free education for the poor, health related problems, making people aware of all the schemes run by the government, etc.
